INDIA is one of the fastest growing economies in the world. The role of infrastructure is paramount and foundation stone for any economy to drive forward. Thus, the government has reiterated its focus on infrastructure sector in Union Budget 2022 and proposed a robust infrastructure spending in fiscal 2022-23 which is expected to positively influence the prospects of the companies in the core infrastructure and allied sectors.

HSBC Infrastructure Fund that endeavours to invest in companies that could gain from the government's policies on infrastructure growth and economic reforms that could directly feed off its growth.

## Why HSBC Infrastructure Fund?

- To create wealth over a long-term from the infrastructure growth in India
- A top down and bottom up approach will be used to invest in equity and equity related instruments
- To create a corpus through generating inflation-adjusted returns to cater to long-term goals

## Fund Philosophy

- HIF is a thematic fund which primarily invest in Infrastructure companies.
- It's a flexi-cap strategy with a flexibility to invest across the market capitalization spectrum.
- Fund mostly follows bottom-up approach for stock selection.

## Key portfolio themes

- We believe that the macro recovery cycle is still underway and has some way to go before turning. In line with that we are invested into the cyclical part of the economy. We believe the earnings growth delivered by these companies will be strong in the medium term partially aided by the economic tailwinds.
- Persistently high Inflation has impacted the margins of corporate India. However, the demand scenario so far has not deteriorated. With commodity prices starting to come down, margins are also showing signs of an uptick. Remain constructive on the businesses that are participating in the current growth trends.
- Inflationary pressures seem to be moderating with correction in crude and global commodity prices and the likelihood of further interest rates increase has reduced. We remain positively biased towards domestic cyclicals, supported by the more robust medium term growth outlook.
- Our positioning in the portfolio is:
- Positive on Capital Goods, Real Estate, EPC, Cement and Logistics sectors.
- EPC companies are expected to benefit from increased traction in Roads, Building Construction, Water, Power transmission and distribution capex as well as Railway capex.
- Pickup in infra capex should drive the demand for some of the capital good companies.
- Improved demand in housing and infra segment along with expected improvement in pricing power due to increased utilization level should be positive for Cement companies.
- Real Estate earnings momentum will be driven by demand factors and industry consolidation benefiting the larger listed players.
- With reform measures like GST and E-way Bills, Logistics sector should be beneficiary of increased supply chain outsourcing.
- Negative on Energy and Utilities, two sectors with high regulatory interference, low sustainable profitability and with plenty of capital misallocation history.
- **Portfolio sectoral positioning:**
  - Overweight: Industrials, Materials and Real Estate
  - Underweight: Energy, Communication Services, Utilities, Consumer Discretionary and Healthcare
- **Sector Attribution (1 year):**
  - O/W in Industrials and U/W in Energy contributed positively to the performance.
  - U/W in Utilities contributed negatively to the performance.
