# The Asset Factsheet - April 2021

# Invest for positive change that lasts for generations

A greener planet is simply a better planet. And with everything that the world is witnessing today, building a more sustainable environment is the only way forward. So come, let's unite and work towards building a cleaner and healthier ecosystem for us, and our forthcoming generations.

## **HSBC Global Equity Climate Change Fund of Fund**

(An open ended fund of fund scheme investing in HSBC Global Investment Funds - Global Equity Climate Change)

HSBC Global Equity Climate Change Fund of Fund - (An open ended fund of fund scheme investing in HSBC Global Investment Funds - Global Equity Climate Change)

This product is suitable for investors who are seeking\*:

- To create wealth over long-term
- Investment predominantly in companies positioned to benefit from climate change through fund of funds route

<sup>\*</sup>Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Investors understand that their principal will be at Very High risk

#### **Market Review**

Significant rise in COVID-19 cases and restrictions being imposed in several parts of the country hurt market sentiments. The second wave has now eclipsed the first wave in terms of new case load and number of fatalities and stretching the health infrastructure in many affected parts of the country. This is still an evolving situation and it is crucial to see when the new infections curve is likely peak out. Last 12 days of April saw more than 300,000 daily new cases and it hit a peak figure of 400,000 cases on the last day of the month. However, the exponential surge witnessed during the first half of April, seems to have moderated towards the end of the month as various states imposed local restrictions to curb the spread (but the absolute new case load figure still remains very high). The state wise rotation trend is providing some hope that the second wave can possibly peak in certain parts of the country soon. States that were first to see the second wave are already seeing deceleration in the number of new cases (Mumbai in Maharashtra and some stagnation seen in Delhi NCR as well) and this template is likely to play out in other regions too suggesting that we may be coming closer to the peak of the second wave. The inoculation drive has now been extended to everyone above 18 years of age and about 9.2% of the population has received at least one dose till now.

BSE Sensex and NSE CNX Nifty indices were down 1.5% and 0.4% respectively but broader market indices outperformed. BSE Small cap index outperformed gaining 5%, while BSE Midcap index gained 0.7% during the month. The 4QFY21 earnings season has turned out to be broadly in-line so far. For the 19

Nifty companies that have declared results so far, the Net sales / adjusted EBITDA/ adjusted PAT have grown 13% / 15% / 37% YoY respectively. There were no sector specific trends visible so far and beats to estimates were more driven by individual company specific factors. Private banks reported decent results with asset quality holding up well in-line with expectations. For Technology names, deal wins and commentary remained strong while revenue performance during the reporting quarter failed to surprise positively. Raw material price inflation impacted Auto profitability during the past quarter.

The high frequency indicators witnessed a slowdown during April owing to localized lockdowns / restrictions. However, given that the restrictions are not as vigorous as seen in the case of the national lockdown last year, most sectors are continuing operations at varying degrees and have not come to a complete halt. Google mobility indicators have seen a meaningful moderation especially since mid-April and is now trending closer to levels seen during September last year. E-way bill generation, fuel consumption, new vehicle registration and power demand also saw moderation. On the positive side, GST collections data showed an increase, rail freight volumes were steady while manufacturing PMI figure for April was stable on a sequential basis.

Apr 2021 was the first month of net outflows (~USD 1.49 bn) from FIIs after Sep 2020. As a result, the CYTD net inflow tally for FIIs moderated to ~USD 5.84 bn. DIIs on the other hand compensated in equal proportion for the FII outflows by remaining net buyers in equities (~USD 1.48 bn) for the second month in a row. There was almost an equal contribution from MFs (~USD 737 mn) and Insurers (~USD 746 mn) to the DII tally during the month. So far this calendar year, the DIIs have been net sellers to the tune of ~USD 1.69 bn, entirely driven by MFs (~USD 2.94 bn of net outflows), while insurers have been net buyers in equities (~USD 1.25 bn of net

#### Global Market Update

The global equity markets traded higher on the back of improved outlook in the developed economies (especially Euro region) after the concerns on the second COVID-19 wave has receded. MSCI World and MSCI Europe indices gained 4.5% and 4.1% respectively while MSCI EM (+2.4%) underperformed. The key events during the month included two key central banks' policy meetings (US Fed and ECB). In the FOMC meeting, the US Federal Reserve left the rates unchanged while at the same time remained committed to the ongoing QE programme. The European Central Bank (ECB) also held rates and kept the QE programme unchanged there as well.

From a global perspective, we are still in the restoration phase of the economic cycle and activity remains below pre-COVID levels in major economies other than China. High unemployment, fragile confidence and risks around vaccine rollout and virus mutations mean the global economy needs ongoing policy support. This was accommodative stance was visible across various central bank decisions / commentaries during April. Near term volatility aside, inflation is likely to remain modest over the medium term, but upside risks have increased in the US and need to be monitored as it will be a key determinant of sustaining the optimism in equities. Also, as investors we need to be vigilantly positive at the current juncture as the measures of expected returns are lower than last year. Consensus beliefs are rooted in sustained policy support and vaccine effectiveness. But with valuations now richer, small disappointments to this scenario can affect market sentiments.

Macro market view
Rapid rise in the number of new COVID cases has emerged as a key concern and its impact on the economic recovery and on growth in general, need to be evaluated. The economic recovery and fundamentals were looking bright over the past few months. There were also some good indications of the beginning of a cyclical recovery. However, the second wave has put a spanner in the works on this optimism and brought in a near term uncertainty. We have witnessed the medical infrastructure getting stretched beyond its capacity owing to the sharp surge in the new cases in several impacted regions of the country. Amidst this humanitarian crisis, the hope is that the second wave should see a peak soon and that remains the base case at this juncture. This baseline assumption has gained confidence on the back of two factors. Firstly, the curve flattening trends seen during the first wave and the same is getting repeated in this second wave in regions such as Maharashtra (specifically Mumbai), which was first region to witness the surge in cases this time around. Secondly, vaccine intervention is a powerful tool this time around and so far, the data suggest that inoculation is an effective way to shield the population from contracting the virus and in bringing down the severity of the infection. The mobility / activity restrictions have been so far localized in nature unlike the national lockdown which we witnessed last year. However, this doesn't mean that the economic impact is not going to be felt. The economic output in 1QFY22 would be impacted adversely leading to downward revision in the overall GDP estimates for FY22. Currently, the consensus GDP growth estimates are at 10.5% and it won't come as a surprise, if this estimate was to be brought down by a percentage point or two. As a result, the economic recovery may get pushed back by a quarter or two, but with a baseline assumption of near term peak to be reach on the new COVID case load, the economic recovery is not expected to be derailed completely. T

#### **Equity Market view**

The impact of the second COVID-19 wave is the key variable to monitor in the near term. The equity markets have been relatively resilient to the second wave and this suggests that market is assessing the disruption to be short term in nature. The market is also drawing some comfort from the corporate commentary in the quarterly results season so far, which have maintained a positive outlook beyond the near term uncertainty.

The baseline assumption is that of a temporary impact from the second wave and the new case load to peak out in 1QFY22 itself. In that scenario, the set-back in the recovery process will be limited to a few months after which we should see the economic rebound. Two other alternate scenarios can also be envisaged, the first one involving a protracted recovery due to an elongated impact of the COVID-19 restrictions and a second scenario of a permanent dislocation owing to the extended impact of the pandemic. Both these scenarios are adversarial ones for a cyclical recovery and hence from an equity market perspective. However, we assign a higher probability for a short term impact (which we are already witnessing) followed by a sharp rebound in the economic activity. Vaccine effectiveness and improved pace of inoculation are central to this thought process of a curtailed impact followed by a swift recovery.

The short term could witness volatility given the evolving scenario around the second wave. However, the outlook from a medium to long term is attractive and the recent budget has provided a fillip to the growth momentum. The strong capex push envisaged in the budget is the best since FY08 and there is an emphasis on the productive use of the deficit for structural gains for the economy. We reckon that the budget vision will put in place the structural growth drivers to be re-ignited by multiplier effect of infrastructure spends and continued consumption demand.

Market movements are dictated by surprises (both positive and negative to what is already priced in), while the lack of it may mean a range bound performance owing to absence of triggers. Currently the consensus earnings expectations for FY22 is factoring in a strong rebound, hence the room for positive surprises have potentially narrowed. The 4QFY21 earnings season has held up well but we see a probability of earnings downgrades in the near term owing to the impact of the second wave. However, in-line with the baseline assumption of only a short term impact, we reckon that the earnings will again be reset higher, once the uncertainty from the second wave recedes (similar to what we saw in FY21). We believe that by having a bottom up approach to stock selection with a focus on names that can deliver positive earnings surprises can lead equity outperformance. Markets may also provide buying opportunities in the interim through short spurts of correction, due to fear or sentimental factors (combination of the second wave and valuations) and those instances can be utilized to add to conviction bets in the portfolio from a medium to long term perspective.

Second COVID wave along with extended impact of restrictions despite the vaccine intervention, hardening of inflation expectations globally and in India and tapering off in liquidity are the key risks in the short term.

#### **Valuations**

Expansion in valuations though make the risk-reward for the equity markets, balanced at this juncture. On conventional valuation metrics like Price to Earnings / Price to Book ratios, the equity indices are trading above historical averages, which make it expensive. However, the lower interest rate environment is likely to remain in the short term as a result the low cost of capital scenario should remain as well. This makes equities relatively attractive compared to other asset classes despite the valuations. On P/E basis, Nifty is currently trading at 20.3x / 17.6x FY22/23 earnings estimates, with significant earnings rebound assumed over the next 4 quarters. We have witnessed 2 consecutive quarters of earnings upgrades, but this trend could halt due to the second wave disruption. On P/B, Nifty is trading at 2.9x / 2.6x FY22/23 estimates.

(Source: Bloomberg, MOSL & HSBC MF estimates as on Apr 2021 end).

#### **Key Factors to Consider**

- COVID-19: Extended impact of the second wave, risk of elongated of restriction or nationwide lockdowns (timeline & regions) and resultant economic impact.
- COVID-19: Vaccination programme and execution / efficiency of the inoculation roll-outs.
- Remainder of the 4QFY21 earnings season and the corporate commentary.
- Key risks are Spike in interest rates, rise in global commodity prices (including crude oil), stimulus being withdrawn too early or the lack of add-on stimulus and geopolitical risks.

#### Portfolio Strategy and Update

We continue to prefer dominant businesses having scalable businesses, available at reasonable valuations. Over the past few years, we've witnessed a trend of profit pool consolidating with the dominant players in respective sectors/industries. We believe that this trend will accelerate as the COVID related disruption is of higher magnitude as well as encompasses more sectors. This has increased our resolve to be true to our philosophy. We believe that those stocks would stand to gain market share even in the sluggish phases of the economy and achieve revenue traction when the economy returns to normalcy. From a medium to long term perspective, the current phase of disruption shall also pave way for accelerated digital adoption by consumers as well as enterprises both in India and globally. Another long term theme is that of diversification of the global supply chain due to 'China + 1' strategy which could be adopted by corporates as well as economies and India could stand to benefit out of that.

We are closely watching the evolving situation related to the second wave. Our baseline assumption is that of a short term impact of the crisis followed by a quick rebound afterwards. As a result, we have not made changes to the portfolio positioning for now and maintain a pro-cyclical bias. This is on the back of a medium to long term view that the economy would see a cyclical recovery due to revival in capex cycle over the next 3-4 years (first by the government followed by private capex). This, we believe has brought in a multi-year earnings growth visibility, providing a constructive outlook for equities in general and domestic cyclical segments in particular. Benign cost of capital and reasonable valuations (in the context of multi-year earnings outlook), should act as additional support to the equity performance, in the medium term. We continue to have bottom up approach along with focus on earnings growth, for stock selection. Companies which can provide strong earnings growth along with positive earnings surprises would continue to do well and would be able provide outperformance. So while earnings growth will still the most important element that we focus on, but within that there is an emphasis on ideas with scope for positive earnings surprises. Our investment strategy will also focus on earnings growth implied by the valuations in the context of prevailing cost of capital and excess liquidity. Due to the evolving scenario connected to the second wave, the markets may remain volatile in the near term and any sharp corrections would be used to add to our conviction bets or where valuations turn reasonable.

We currently hold positive view on Financials, Industrials, Healthcare, Real Estate, Technology and Consumer Discretionary sectors in-line with the thought process outlined above. We are also looking beyond the current disruption on account of the second wave, which we believe would be temporary in nature. We are neutral on Materials. The recent budget has all the ingredients to revive the capex cycle, which was so far missing and should also gradually lead to pick up in the investment cycle. This in turn can potentially raise the long term sustainable growth rate of the economy by close to couple of percentage points in our view. That reflects our positive view on Financials and Industrials sectors. Banks also should benefit from the budget focus around the system clean-up and growth orientation. We believe that Financials and Industrials have the potential to surprise positively on earnings momentum, post the current disrupted phase. In Financials (specifically in private banks), we believe that the earnings surprises will be driven by lower than expected credit costs coupled with recovery in credit growth. In Real Estate it will be driven by demand factors (residential affordability) and industry consolidation benefiting the larger listed players. We are also positive on Cement and Specialty chemicals, owing to strong demand recovery in the former while the latter being a beneficiary of the global supply chain diversification away from China. Our exposure in the Consumer Discretionary basket is oriented towards Auto and within non-auto segment the preference is for market leaders / dominant players. Technology is another sector that we like. We believe that the current trend of digital adoption and "migration to cloud" are structural in nature and this should result in improving growth momentum over medium term. We hold negative view on Consumer Staples, Telecom (both due to lack of earnings surprises), Energy and Utilities.

#### **Debt Markets**

#### **Market Summary**

The month of April witnessed a volatile fixed income markets with the one end being driven by the intensifying pandemic, supply pressures and denouncing the positives of RBI actions. The other end was primarily due to RBI's support in the form its own QE (quantitative easing via GSAP), OMOs and auction cancellations. Heading into the RBI policy and post policy, market witnessed a strong rally with the benchmark touching 6% at one point. However, the euphoria of the G-SAP and RBI sending a strong message reiterating its commitment was short-lived. With the 2nd wave of the pandemic intensifying coupled with the fear of lockdown, benchmark once again touched a peak at 6.15 in the middle of the month and the first G-sec auction of the year witnessing devolvement. In the 2nd half of the month, market saw some relief supported by RBI with the benchmark closing ~6.03%. RBI cancelled auctions when perhaps the expected yield was too high and towards the end of the month also announced an additional Operation Twist for INR 100 bn. Also, while RBI stated in its policy that they intended to conduct longer dated variable repo auctions, they did not implement the same and stuck to 14-day tenor only. Furthermore, very low issuance of SDLs lent some support to the G-sec supply for the month. Overall, we saw steepening of the curve with up to 5-year rallying 20-25bps and 5 – 10 year witnessing 10-15bps of rally. The longer end beyond 10 year witnessed up to 10bps of rally.

The last auction of the month went better than expected with RBI exercising the green shoe option for ~INR 48 bn. This along with the twist operations announced, strong GST collections has improved market confidence with the benchmark going back to ~6% levels on the first trading day of May 2021.

While the increase in incidence of Covid cases is definitely a cause of concern, so far since the incidence is more concentrated, it is not expected to have a deeper economic impact. Therefore, markets so far have shrugged off any potential for shocks on the fixed income side as any adverse economic impact requiring any one-off fiscal stimulus may not arise.

#### Outlook

While the pandemic has intensified and we are seeing the disruption in economic activity intensifying, it is still not expected to be as widespread and deep as the last year. The key reason being the a) vaccination is ongoing and b) lockdowns are more localized and not broad based. In addition, government so far does not seem to be in the mood to give any financial sops that would derail the fiscal commitments. The revenue side may be pressurized, but given the estimates were conservative on the outset, it suggests that at least meeting the fiscal targets should not be a challenge and therefore no additional borrowing is envisaged. Furthermore, RBI's actions post policy with an Operation Twist in addition to its planned G-SAP program suggests that RBI will remain committed to being accommodative and manage the borrowing program in a non-disruptive manner.

The recent GST numbers suggest that once growth resumes, tax collections are likely to grow in a robust fashion and should provide relief to the bond markets. Besides, forecast of a normal monsoon this year by the IMD bodes well for retaining rural growth. Nevertheless, one cannot overlook the heavy supply in the near term and the emerging pandemic jitters. In addition, inflation risks and its associated impact on central bank's rate and policy action will linger. Therefore, pressure on yields would continue to remain preventing any strong rally. On the liquidity front, RBI's OMO actions should be supportive for liquidity. In addition, government spending will add to the system liquidity. Therefore, we expect the short-medium part of the curve to outperform the longer end going ahead.

In the corporate space, we did not see as much of a volatility as in the G-secs as seasonally supply has been low and will remain low for the first six months. Therefore, we should see the spreads remaining stable in the short to medium part of the curve.

#### Index of Industrial Production (IIP)\* new series data

#### RBI Policy - Support for growth continues

RBI in its first monetary policy for FY22, reiterated their priority for growth; support via unconventional policy measures such as the G-SAP announced in this policy. It was once again a testimony that RBI will maintain its accommodative rate stance using unconventional measures to keep the rates stable. In addition, with the onus to manage a borrowing program to ensure an orderly evolution of yield curve, and therefore congenial financial conditions, RBI has announced a balance sheet expansionary policy with committed volume of direct open market operations. This has been an ask for quite some time and RBI delivering on this front as well, is a strong signal that RBI will do what it takes to preserve financial stability and a testimony that RBI will not let go of its reins on the financial market. This is despite being constrained on the inflation front an expansionary balance sheet program is a bold move.

Also, while the increase in quantum and tenor of VRRR limits could have increased the short term rates, liquidity infused via G-SAP should reasonably balance the pressure. In summary, we believe that RBI is in no rush for any direct rate actions or liquidity withdrawal mode. RBI has time and again used unconventional policy measures which have an implicit impact on rates.

Key policy actions were as follows:

- Repo rate at 4.0%; Reverse Repo at 3.35% and Marginal Standing Facility rate at 4.25%.
- Announced a G-Sec Acquisition Program, G-SAP 1.0 targeting INR 1 trillion for Q1FY22 with first purchase of INR 250 billion on April 15, 2021
- Reiterated commitment to maintaining surplus liquidity
- Longer tenor Variable Rate Reverse Repo auctions to be undertaken based on market conditions
- FY22 GDP growth retained at 10.5%; Inflation estimates revised marginally upwardscollections will be strong. Until then RBI support may be vital to keep the rates contained.

keep the rates contained.		
Key rates (in %)	Current	Previous month
3M T-Bill	3.30	3.27
1Y G-Sec	3.76	3.75
3Y G-Sec	4.77	4.93

1Y OIS	3.75	3.86
5Y OIS	5.19	5.25

## GST collections: Record collections raising hopes of better than expected tax collections once growth resumes

April GST collections came in at the highest number so far at INR 1.41 lakh crore, with seven consecutive months reporting over INR 1 lakh crores. While this collection is of March 2021 before the lockdown and larger impact of pandemic, the collection could reiterate the fact that once the impact of the second wave subsides, growth recovery and the resultant tax collections will be strong. Until then RBI support may be vital to keep the rates contained.

## Inflation Outlook: Near term favorable, but supply side pressures can resurface

Headline CPI inflation for March came in at 5.5% y-o-y in line with market consensus estimates. This compares to 5.03% in February, 4.06% in January and 4.59% in December. While food inflation remains subdued, core inflation remains pressured with idiosyncratic increases across segments such as fats, fuel, transport and communication. While the second wave may slow down the demand side pressures, supply side pressures can resurface. Also higher oil prices will pose a risk to inflation. Overall, inflation risks are likely to linger on.

#### External Factors - Oil inching upwards while currency has been supported by flows

- Oil: : Oil prices have been gradually inching upwards during the month starting from USD63.5/barrel and closing at USD67.3/barrel. While we saw oil peaking towards similar levels in previous month, this time demand recovery in US and China are now balanced by concern from the India side. Once demand recovers and economy recovers, the risk of oil price increase eventually translate into feeding into inflation remains as petrol/diesel prices in India are close to the record high. Diesel being the primary fuel for transportation could eventually feed domestic CPI across the board.
- Currency: USDINR depreciated during the month starting from 73.11 touching a high of 75.05 during the course of the month before closing the month at 74.1. While the initial sell-off may have been triggered by RBI's asset purchase announcement, the impact got magnified as the pandemic intensified resulting in weaker growth which triggered a sell off from the equity side (~\$1.5bn). However, with RBI holding \$584bn of reserves we do not anticipate any currency shocks as RBI has enough reserves to step in to contain any undue volatility.

<sup>^</sup>Debt Allocation of 85% and 35% in respective indices represented by CRISIL Composite Bond Index.
£ The equity component of the Index has been changed from Nifty 50 to S&P BSE - 200 and will be represented by Total Return variant of S&P BSE - 200 TRI.
# Monthly income is not assured and is subject to the availability of distributable surplus.
^The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price.

Criteria for Large, Mid & Small companies - SEBI has demarcated the definitions of large cap, mid cap and small cap companies as given below.

Large Cap: 1st -100th company in terms of full market capitalization, Mid Cap: 101st -250th company in terms of full market capitalization, Small Cap: 251st company onwards in terms of full market capitalization of large/mid/small cap companies. A list of stocks as per above criteria will be uploaded on AMFI website and updated every six months by AMFI.

## **HSBC Large Cap Equity Fund**

Large Cap Fund - An open ended equity scheme predominantly investing in large cap stocks.

**Investment Objective:** To generate long-term capital growth from an actively managed portfolio of equity and equity related securities of predominantly large cap companies. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

#### This product is suitable for investors who are seeking\*:

- To create wealth over long term
- Investment in predominantly large cap equity and equity related securities

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Investors understand that their principal will be at Very High risk

## **HSBC Flexi Cap Fund**

Flexi Cap Fund - An open ended dynamic equity scheme investing across large cap, mid cap, small cap stocks.

Investment Objective: To seek long term capital growth through investments made dynamically across market capitalization (i.e. Large, Mid, and Small Caps). The investment ould be in any one, two or all three types of market capitalization. The Scheme aims to predominantly invest in equity and equity related securities. However, in line with the asset allocation pattern of the Scheme, it could move its assets between equity and fixed income securities depending on its view on these markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

#### This product is suitable for investors who are seeking\*:

- To create wealth over long term
- · Invests in equity and equity related securities across market capitalisations

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Investors understand that their principal will be at Very High risk

## **HSBC Small Cap Equity Fund**

Small Cap Fund - An open ended equity scheme predominantly investing in small cap stocks.

Investment Objective: To generate long term capital growth from an actively managed portfolio of equity and equity related securities of predominantly small cap companies. However, it could move a portion of its assets towards fixed income securities if the fund manager becomes negative on the Indian equity markets. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

#### This product is suitable for investors who are seeking\*:

- To create wealth over long term
- Investment in predominantly small cap equity and equity related securities

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

Investors understand that their principal will be at Very High risk

## **HSBC Global Consumer Opportunities**

An open ended fund of fund scheme investing in HSBC Global Investments Fund - China Consumer Opportunities Fund.

Investment Objective: The primary investment objective of the scheme is to provide long term capital appreciation by investing predominantly in units of HSBC Global Investment Funds (HGIF) China Consumer Opportunities Fund (Underlying scheme). The Scheme may, also invest a certain proportion of its corpus in money market instruments and / or units of liquid mutual fund schemes, in order to meet liquidity requirements from time to time. However, there can be no assurance or guarantee that the investment objective of the scheme would be achieved.

#### This product is suitable for investors who are seeking\*:

- To create wealth over long term
- Investment in equity and equity related securities around the world focusing on growing consumer behaviour of China through feeder route

\*Investors should consult their financial advisers if in doubt about whether the product is suitable for them.

#### Past performance may or may not be sustained in the future. Refer note below.

Pursuant to the circular issued by SEBI on 'Categorization and Rationalization of the Schemes', there has been change in the fundamental attribute(s) of the aforesaid scheme(s) effective from Mar 14, 2018. Since inception returns are to be provided since the date of allotment of units.

Simple Annualised growth rate of the scheme only for the past 6 months from the last day of month-end preceding the date of advertisement to be provided. [Exception: Overnight funds, Liquid funds and Money Market funds where performance can be advertised by simple annualisation of yields if a performance figure is available for at least 7 days, 15 days and 30 days]

The benchmark of the scheme has been changed from S&PBSE 200 TRI to NIFTY 500 TRI with effect from November 18, 2019.

The performance details provided herein are of other than Direct Plan - Growth Option. Returns on `10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of April 2021 for the respective Schemes. Returns for 1 year and Above are Compounded Annualised. Returns for less than 1 year is Simple Annualised. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme vibe lower to the extent of the distribution expenses / commission charged to the Other than Direct Plan. The performance data of the scheme(s) managed by the respective Fund Manager which has/have not completed 6 month is not provided. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open ended schemes.

Pursuant to the circular issued by SEBI on 'Categorization and Rationalization of the Schemes', there has been change in the fundamental attribute(s) of the aforesaid scheme(s) effective from Mar 14, 2018.

The Performance of HSBC Global Equity Climate Change Fund of Fund (managed by Priyankar Sarkar and Kapil Punjabi) is not given since the scheme has not completed one year from the date of inception.

Since inception returns are to be provided since the date of allotment of units.

\*Simple Annualised growth rate of the scheme only for the past 6 months from the last day of month-end preceding the date of advertisement to be provided. [Exception: Overnight funds, Liquid funds and Money Market funds where performance can be advertised by simple annualisation of yields if a performance figure is available for at least 7 days, 15 days and 30 days]

HSBC Focused Equity Fund (managed by Neelotpal Sahai and Gautam Bhupal) has been in existence for more than 6 months but less than 1 year, hence the returns are given for 6 months and Since Inception.

\*Additional benchmark as per SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021

The performance details provided herein are of other than Direct Plan - Growth Option. Returns on '10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of April 2021 for the respective Schemes. Returns for 1 year and Above are Compounded Annualised. Returns for less than 1 year is Simple Annualised.. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses/commission charged to the Other than Direct Plan. The performance data of the scheme(s) managed by the respective Fund Manager which has/have not completed 6 month is not provided. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open ended schemes.

The Fund offers flexible and convenient Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say ₹10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of Respective Scheme. The returns are calculated by XIRR approach assuming investment of ₹10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.

#### Past performance may or may not be sustained in the future. Refer note below.

Pursuant to the circular issued by SEBI on 'Categorization and Rationalization of the Schemes', there has been change in the fundamental attribute(s) of the aforesaid scheme(s) effective from Mar 14, 2018.

Since inception returns are to be provided since the date of allotment of units.

\*Simple Annualised growth rate of the scheme only for the past 6 months from the last day of month-end preceding the date of advertisement to be provided. [Exception: Overnight funds, Liquid funds and Money Market funds where performance can be advertised by simple annualisation of yields if a performance figure is available for at least 7 days, 15 days and 30 days]

\*Additional benchmark as per SEBI circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021

The performance details provided herein are of other than Direct Plan - Growth Option. Returns on `10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of April 2021 for the respective Schemes. Returns for 1 year and Above are Compounded Annualised. Returns for less than 1 year is Simple Annualised. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged to the Other than Direct Plan. The performance data of the scheme(s) managed by the respective Fund Manager which has/have not completed 6 month is not provided. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open ended schemes.

#### Past performance may or may not be sustained in the future. Refer note below.

Pursuant to the circular issued by SEBI on 'Categorization and Rationalization of the Schemes, there has been change in the fundamental attribute(s) of the aforesaid scheme(s) effective Mar 14, 2018.

Pursuant to SEBI circular dated Sept 13, 2012, certain Plans / Options within the schemes have been discontinued to comply with a single plan structure. Since there was no continuous NAV history available for the surviving Plan prior to 1 October 2012, returns since the said date have been considered for calculating performance. The inception date of HSBC Low Duration Fund however is 17 October 2006.

<sup>2</sup>Pursuant to SEBI circular dated Sept 13, 2012, certain Plans / Options within the schemes have been discontinued to comply with a single plan structure. Since there was no continuous NAV history available for the surviving Plan prior to 19 May 2011, returns since the said date have been considered for calculating performance. The inception date of HSBC Cash Fund however is 4 December 2002.

Since inception returns are to be provided since the date of allotment of units.

Simple Annualised growth rate of the scheme only for the past 6 months from the last day of month-end preceding the date of advertisement to be provided. [Exception: Overnight funds, Liquid funds and Money Market funds where performance can be advertised by simple annualisation of yields if a performance figure is available for at least 7 days, 15 days and 30 days]

HSBC Corporate Bond Fund (managed by Ritesh Jain) has been in existence for more than 6 months but less than 1 year, hence the returns are given for 6 months and Since Inception.

The performance details provided herein are of other than Direct Plan - Growth Option. Returns on `10,000 are point-to-point returns for the specific time period, invested at the start of the period. The returns for the respective periods are provided as on last available NAV of April 2021 for the respective Schemes. Returns for 1 year and Above are Compounded Annualised. Returns for less than 1 year is Simple Annualised. Load is not taken into consideration for computation of performance. Different plans shall have a different expense structure. The expenses of the Direct Plan under the Scheme will be lower to the extent of the distribution expenses / commission charged to the Other than Direct Plan. The performance data of the scheme(s) managed by the respective Fund Manager which has/have not completed 6 month is not provided. Considering the varying maturities of the close ended schemes, the performance of close-ended schemes is not provided as it is strictly not comparable with that of open ended schemes.

### Section II - How to read Factsheet

#### Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme,

#### **AUM**

AUM or Assets Under Management refers to the recent updated cumulative market value of investments managed by a mutual fund or any investment firm.

#### **Benchmark**

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec

#### Beta

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

#### **Exit Load**

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption. For instance, if the NAV is Rs 100 and the exit load is 1%, the redemption price would be ₹99 per unit.

#### **Entry Load**

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101.

**Note:** SEBI, vide circular dated June 30, 2009 has abolished entry loan and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the services rendered by the distributor.

#### **Fund Manager**

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

#### **Holdings**

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

#### Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

#### **Modified Duration**

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

#### NAV

The NAV or the Net Asset Value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

#### Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

#### **Rating Profile**

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

#### Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

#### SIP

SIP or Systematic Investment Plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years.

#### **Standard Deviation**

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, its means its range of performance is wide, implying greater volatility.

#### **Yield to Maturity**

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.
