Peace of mind comes with balance. Investors often strive to strike a balance between the risk associated with their investments and proportionate returns. It is a known fact that equities, over a longer period of time, prove to be unwavering wealth creators. However, despite long-term growth opportunities, investors take caution while investing in equities, due to the intermittent risk. A solution to this could be a portfolio mix of equities, debt and arbitrage opportunities that could help achieve the desired risk-return profile, along with tax efficiency.
